Flexible Design to Suit Your Needs

Ready for immediate occupation as a technology / manufacturing facility, this Advance Building Solution can also be configured to accommodate large scale office activities (subject to planning).

The existing office space within the building can accommodate approximately 100 staff and the generous floor to ceiling height of the technology space gives potential for the introduction of a mezzanine floor, which could accommodate a further 200 staff or more. Think green and create an indoor garden, enhance natural daylight with the addition of roof lights and there is already an electric car charging point on site.
